**EXCELLENCE IN
'COOL ROOF' COATINGS**

- Applied to a vast range of roof materials e.g. asbestos, concrete or metal sheeting.
- 'Cool Roof' technology either reflects or spays over 85% of the sun's rays, & reduces the surface temperature.
- Dramatically reduces building cooling costs and carbon emissions.
- Reduces roof damaging thermal shock (expansion / contraction) and therefore extends the life of your flat roofs or gutters.
- System warranty up to 20 years.

**GUARANTEED TO
SAVE YOU MONEY!**
